Education

Georgia Institute of Technology, College of Computing

M.S. in Computer Science, Specialization in Artificial Intelligence

Online

In progress

DePaul University, Kellstadt Graduate School of Business

M.S. in Economics and Policy Analysis

Chicago, IL

2017

University of Missouri

B.S. in Economics

Minors: Mathematics, Business Administration

Columbia, MO

2016

Experience

J.P. Morgan Chase Institute

Research Associate/Data Scientist

Washington, DC

April 2023 – Present

- Designed and implemented ETL pipelines in Scala and PySpark on Databricks, linking multi-source administrative and transactional datasets (billions of records) for downstream research and analytics.
- Developed a Python library for standardizing ingestion, cleaning, and joins to credit bureau data, enabling scalable, reproducible analytics across teams.
- Published two reports on the costs of health insurance to small businesses using checking and spending data.
- Provided econometric analysis for a report on the effect of advanced child tax credits on tax-time spending.

Consumer Financial Protection Bureau

Research Analyst, Office of Research

Washington, DC

August 2021 – February 2023

- Performed economic and policy analysis to estimate cost burdens and impacts of proposed rule-makings.
- Estimated the impact of proposed caps on credit card late fees on late payment incidence.
- Published a report quantifying the prevalence of medical debt in collections in the U.S. and the impact of recent changes in credit reporting standards, using the CFPB Consumer Credit Panel.

Federal Reserve Board of Governors

Senior Research Assistant, Research & Statistics

Washington, DC

June 2018 – July 2021

- Modernized credit bureau data pipelines, parallelizing and refactoring workflows from Stata to R.
- Managed SQL-based economic prediction survey administered to all economists at the Board and produced summaries and visualizations for internal stakeholders. Served as a lecturer and member of the content committee for the Board's Econ181 course on Statistical Programming and Financial Literacy in R.
- Developed a program to download and merge Community Reinvestment Act data with FDIC Summary of Deposits data and calculate the geographic distance from all branches to county and census tract centroids for use in studying average bank lending distance.

Kellstadt Graduate School of Business

Graduate Research Assistant, Department of Economics

Chicago, IL

August 2016 – December 2017

University of Missouri

Teaching Assistant, Intermediate Microeconomics

Columbia, MO

December 2015 – May 2016

Honors

National Science Foundation Graduate Research Fellowship – Honorable Mention (Economics)

March 2021

Estimation of Student Debt Overhang Using State Residency Applications

Graduate Assistantship

DePaul University

November 2016

Teaching Assistantship

University of Missouri

December 2015

Skills

Python (PySpark), R, Stata, SAS, Scala, SQL, LaTeX, Databricks, Git, Docker, Jira
